SUMMARY

Entry-level software engineer with a Computer Engineering degree and proven experience applying programming to automate workflows in Fortune 500 defense operations. Skilled in JavaScript, SQL, and React with a track record of building full-stack applications through internship experience and recent development projects. Brings engineering discipline and systems thinking to software development.

EXPERIENCE

Lab Manager (Software Development & Automation)

Sep 2021 – Present

Raytheon

Dallas, TX

- Built and deployed a SQL-based inventory management system, boosting accuracy by 25% and reducing stock discrepancies by 30%.
- Developed custom JavaScript and MATLAB applications, saving 10+ hours/week by automating data analysis workflows.
- Automated recurring lab processes by integrating equipment with software, improving efficiency by 20%.
- Directed daily operations across 10+ laboratories, optimizing workflows and ensuring compliance.
- Established a safety-first culture through training and audits, maintaining an accident-free workplace for 3+ years.

Software Engineer Intern

Sep 2020 – Jan 2021

Corserva

Orlando, FL

- Achieved a 30% increase in battery life performance for each Bluetooth Smartwatch by optimizing power consumption algorithms.
- Practiced strong configuration management and version control for 20+ projects across seven teams.
- Enhanced software efficiency by 18% through rigorous bug fixing and comprehensive process documentation.
- Designed and coded 1,000+ unit and integration testing using Jest and test-driven development (TDD).
- Updated 30+ electrical schematics using KiCad for record-keeping and power system modeling.

EDUCATION

University of Central Florida

Orlando, FL

Full Stack Development Boot Camp

Nov 2021

University of Central Florida

Orlando, FL

Bachelor of Science in Computer Engineering

Dec 2020

PROJECTS

VolunteerHub | *Node.js, Express.js, MySQL, Sequelize, Handlebars.js, Bootstrap, Twilio API* Jul 2025 - Aug 2025

- Built a full-stack volunteer platform connecting 100+ volunteers with organizations, featuring secure authentication and role-based access.
- Integrated Twilio SMS API for real-time notifications improving user communication efficiency by 40%.

Tech-Blog | *HTML/CSS, JavaScript, Node.js, MySQL, Sequelize, Handlebars, Git*

May 2025 – Jun 2025

- Developed CRUD functionality for articles and comments to create, read, update, and delete content.
- Optimized Handlebars.js to dynamically generate HTML elements, resulting in a 40% reduction in page load times and enhancing user engagement by 25%.

Smart Watch | *Java, Gradle, Android SDK, Bluetooth API, Sensor API, Firebase, JUnit*

Sep 2020 – Jan 2021

- Programmed a Java application for a smartwatch to unlock “Alfred Lock” doors when within 3 feet.
- Coordinated closely with a team of 10+ engineers and designers to integrate software with hardware.

TECHNICAL SKILLS

Programming Languages: JavaScript, SQL, HTML/CSS

Frameworks: React, React Native, Node.js, Material-UI

Databases: MySQL, NoSQL, MongoDB, Firebase

Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, Postman, Insomnia, JUnit
